INFORMATION THAT MAKES ALL THE DIFFERENCE

-Carrie Molke, Director, Bureau of Aging & Disability Resources - WI Department of Health Services

Communications and information technology has revolutionized in the last couple decades, making access to information much easier today than ever before. Yet, more information does not make people more informed. As Albert Einstein said, "Information is not knowledge."

Aging and Disability Resource Centers (ADRCs), 2-1-1 providers and other I&R/A professionals help turn information into knowledge. They do this by providing accurate, up-to-date and un-biased information, tailored to a person's circumstances; by listening with compassion and non-judgement; and helping people access services- motivated only by getting people what they need. Carrie Molke will provide her perspective on the importance of information and assistance professionals in serving as the lynchpin in our long-term care system. She will share stories gathered over her twenty-year career in the Bureau of Aging and Disability Resources and her thoughts on the future direction we must take to continue to grow and transform information into knowledge for generations to come.
